## **CP-500 Premium LEED Guide**

### **CP-500 Premium LEED Product Information**

CP-500 Premium is a siloxane based penetrating water repellent designed to protect masonry, concrete and other porous building materials against damage due to penetration of water and waterborne chemicals.

### **CP-500 Premium LEED Credit Qualification**

See the attached CP-500 Premium LEED Guide

### **Manufacturing Location**

Oklahoma City, OK

### **Recycled Content**

CP-500 Premium is manufactured without the use of post-consumer materials.

### **Certification Date**

May 1, 2008

**CP-500 Premium LEED Guide**  
**by**  
**Chemical Products Industries, Inc.**

**LEED New Construction & Major Renovation 2.2 Credits with CP-500 Premium Water Repellent manufactured by Chemical Products Industries, Inc.**

**1. Materials and Resource Credit 5.1/5.2: Regional Materials: 10%, 20% Extracted, Processed and Manufactured Regionally**

**Use building materials or products that have been extracted, harvested or recovered, as well as manufactured, within 500 miles of the project site for a minimum of 10% (based on cost) of the total materials value.**

This requires dividing the cost of the < 500 mile product by the cost of the > 500 mile product to determine the < 500 mile percentage. Water repellent products coming from > 500 miles away decrease the < 500 mile percentage. CP-500 Premium, manufactured in Oklahoma City, OK, keeps other water repellent products out of the calculation thus increasing the < 500 mile percentage.
